Vintage Gear Repair · Soldering & Electronics · CAD / 3D Printing · Dante / Audio Over IP
Audio Post / Voice-Over · Studio Management

PROFESSIONAL EXPERIENCE

Bias Studios

June 2024 - Present

Freelance Engineer

- Engineered a large-format big band tracking session for the USAF Airman of Note, handling mic setup, line checks, and Pro Tools operation across a high-channel-count, multi-day recording
- Record and mix music sessions across pop, rap, gospel, and jazz on vintage API consoles; credits include Polo G, Mick Jenkins, Nino Paid, John McCutcheon, Tom Paxton, and Patrick Lundy & The Ministers of Music, with additional voice-over and podcast work for clients including DC Comics and Wondery Podcasts
- Maintain, troubleshoot, and repair vintage outboard gear, console modules, and facility systems
- Designed and 3D printed a replacement for an obsolete U47 power supply connector, minimizing downtime and repair cost
- Work closely alongside the studio owner and senior engineers, building relationships with artists, producers, and clients across a wide range of genres and formats

Waynes Room Studios

July 2021 - Present

Head Engineer, Owner

- Constructed and operate a professional recording studio, managing all business operations, client relationships, equipment, and facilities — developing a first-hand understanding of the challenges and decisions that go into running a studio
- Installed a 7.1.4 Dolby Atmos monitoring system that was featured on Genelec's "Immersive Talks" blog
- Provide mixing services in both stereo and immersive formats
- Built a client base from scratch through referrals, social media, and community presence, demonstrating the ability to develop business independently

Christ Church Millwood

September 2022 - May 2024

Audio Consultant

- Proposed and implemented audio, video, and networking solutions for the facility, allowing church services to be live streamed.
- Constructed and managed CAT5-e cabling infrastructure for improved AV system functionality, enabling multi-camera operation
- Equipped church staff with resources and training for ongoing AV system maintenance
